JEREMY WHITENECT

OBJECTIVE

Motivated computer science student seeking to gain experience in software development with complement to studies. Eager to apply acquired skills as well as theoretical knowledge gained through schooling to practical projects in the workplace. Proficient in C, Java, JavaScript, HTML and CSS with a strong interest in learning and applying new languages, technologies, and methodologies. Looking for opportunities to grow and develop in the software engineering space.

SKILLS

- Experienced in the programming languages, C#, C++, Python, Java, JS
- Skilled in the markup language HTML and the stylesheet language CSS
- Can work with databases and integration of databases into programs
- Ability to write clean, reuseable code following best practices
- Able to create working web apps with Spring Boot
- Can work in a team or solo
- Time management skills to prioritize and balance multiple tasks
- Strong problem-solving skills
- Strong ability to work with Microsoft software
- Easily able to adapt to new software and environments

Dartmouth High School, Dartmouth, Nova Scotia

Graduated 2023

Relevant Coursework:

- Programing 12:
    - Covered fundamental programming concepts in Java
    - Went over basic object-oriented programming concepts
    - Completed projects including a text adventure game and blackjack

- AP Computer Science:
    - Covered programming concepts in Java in more depth
    - Gained experience with abstraction, algorithms, and data analysis

EMPLOYMENT   **Post Secondary Accessibility Services, Tutor**

September 2024-April 2025, Remote

- Tutored a fellow student through the Post Secondary Accessibility Services program
- Learned how to teach people and help them understand tricker concepts
- Gained the ability to learn and grow from my own teaching
- Managed tutoring someone while also balancing my own workload

Hivo Inc., Product Specialist

April 2025-June 2025, Remote

- Worked at Hivo. Inc, a space provider for my work term though NSCC
- Did work on the frontend websites, frontend mobile application, and backend
- Learned TypeScript through this work term as it was not taught to me with NSCC
- Added features such as OTP verification, and created a landing page from scratch
- Had daily Scrums with CEO and other team members, coordinating workload
- Used GitHub to separate features, then merging and dealing with merge requests
- Worked with the design team to create and change designs based on specifications
